Signature giving authorization to charge card once pre-purchase exam is complete:

_____ Date: _____

Pre-Purchase exams start at \$225. This includes our ambulatory fee, full physical exam, ophthalmic and dental exam. This also includes a lameness exam with standard flexions if tolerated by patient. If radiographs are requested they are \$249.50 for a four view joint radiograph and additional joints are \$92 each. We also provide an upper airway exam and/or gastric scoop that is \$225. If requested we can run a complete blood count and an equine profile for \$137.50. Sedation is additional. ****Additional testing will be individually estimated. **Evaluation of radiographs taken will be performed and submitted with complete written report in 5 business days.**

Disclaimer: It is important to remember that the pre-purchase examination can only give the information about the horses' health and condition on that day of the exam. While this information is very important, it is unfortunately never a complete picture. Many factors that impact the horse's health are not necessarily detectable on the day of exam. The veterinarian cannot predict the horse's future and no guarantee can be issued.

The role of the veterinarian in the pre-purchase exam is not a "pass" or "fail" the horse. Instead it is to help you, the buyer, to make a more informed decision by providing information about the horses' health. Ultimately the decision to purchase this animal can only be made by the prospective buyer.
